

Module Details	
Module Title	Applied Clinical Knowledge and Professional Practice
Module Code	PHA7063-C
Academic Year	2023/4
Credits	30
School	School of Pharmacy and Medical Sciences
FHEQ Level	FHEQ Level 7

Contact Hours	
Type	Hours
Seminars	40
Practical Classes or Workshops	60
Directed Study	200

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Academic Year

Module Aims
<ul style="list-style-type: none"> - To enable students to reflect upon and share their learning from clinical experience - To provide teaching and simulation opportunities to advance consultation skills in routine, complex and difficult situations

Outline Syllabus
<p>Clinical placement learning. Advanced consultation skills including communication in dementia, with an aggressive patient, breaking bad news, learning disabilities. Simulation in emergency situations.</p> <p>Additionally, these also include shared decision making and triadic consultations as well as explanation of diagnoses, procedures and medications. Students will deliver case presentations throughout the year requiring consideration and reflection upon patient perspective, social, cultural, legal and ethical issues and concordance with medical advice and therapeutics. This will inform and provide feedback for the summative reflective essay, the summative OSCE and inform the synoptic ePortfolio.</p>

Learning Outcomes	
Outcome Number	Description
01	Demonstrate competence in consultation skills which are tailored to the needs of the patient and the clinical situation and formulate appropriate differential diagnoses and management plan based on the information obtained.
02	Communicate effectively and appropriately with patients and carers even when communication is difficult (e.g. patients with dementia, handling strong emotions).
03	Demonstrate effective communication and engagement with children, young people and families and recognise when to take appropriate action in safeguarding and promoting the welfare of the child.
04	Interpret the findings from the consultation (history, physical examination and mental state examination), in order to determine the need for further investigation and/or the appropriate direction of patient management.
05	Formulate and implement a management plan in collaboration with the patient, the carers/parents and other healthcare professionals.
06	Working under medical supervision, determine and propose appropriate therapeutic interventions from the full range of available prescription medications used in the clinical setting.
07	Identify when to share information in a timely and accurate manner while respecting legislation on the control and confidentiality of information.
08	Critically evaluate the theoretical basis and practical methodologies underpinning the consultation process.
09	Present evidence of satisfactory completion and engagement with Inter-Professional Learning opportunities.

Learning, Teaching and Assessment Strategy
<p>Individual and group learning as well as inter-professional and multidisciplinary work. Scheduled Inter-Professional Learning (IPL) opportunities must be attended and completed satisfactorily and are a pass/fail component of this module. Supplementary assessment where students fail to attend scheduled IPL events is a 1000 word reflective essay.</p> <p>Students will be assigned reflective tasks at regular intervals throughout the module both to support specific learning and teaching sessions and to help them build their ePortfolio. A reflective essay will demonstrate students' understanding and analysis of literature underpinning consultation skills, patient centred care, clinical diagnosis and decision making related to their own practice. These must be passed at a minimum standard.</p> <p>Students will be assessed on their consultation and clinical skills by an OSCE which requires them to show integration of their knowledge and consultation skills. To pass the OSCE students MUST GAIN A MINIMUM SCORE OF 60% and MUST ALSO PASS AT LEAST 8 OF THE 10 STATIONS in order to evidence a broad range of clinical skill and knowledge and so that in-depth knowledge of a limited breadth cannot be compensated. There will be a formative/mock OSCE to prepare for summative.</p>

Mode of Assessment			
Type	Method	Description	Weighting
Summative	Attendance requirement	Attend Inter-Professional Learning opportunities (PASS/FAIL). SUPPLEMENTARY if non-attendance: Reflection (1000 words)	0%
Summative	Coursework - Written	Essay with reflective component (3000 words)	40%
Summative	Objective Structured Clinical Examination	100 minutes OSCE: Pass at least 8 of 10 stations (PASS AT 60%, MUST PASS)	60%
Formative	Objective Structured Clinical Examination	Formative OSCE	N/A
Formative	Coursework - Written	Formative feedback on an early essay draft/outline (up to 600 words)	N/A

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
